

The Game View resolution options

option. It is also possible to Mute Audio by selecting the required option from the Toolbar. The Stats option provides detailed rendering statistics about the audio and graphics of your game. The Gizmos menu provides a wide range of options to control the look of objects and icons. Please refer to Understanding Gizmos Menu section for additional coverage.

Game View advanced options.

If you right click on the Game tab, you will view advanced options related to the Game view. If you enable Warn if No Cameras Rendering option, a warning will be displayed if none of the cameras are rendering on the display. If Clear Every Frame in Edit Mode option is enabled, the frames will be cleared when the relevant game is not being played. The purpose of this option is to avoid smearing effects.

Introduction to the Profiler

The Unity Profiler Window exists so that you can optimize your game. This is where you see reports on how much time you are spending on various
