

Changing the scale of the plane.

cursor over the Scene view, type the F key, or choose Edit > Frame Selected from the menu to see the entire game object in the Scene view. Looking at our current scene, we can see grid lines indicating the plane at origin. For the purposes of this project we will turn them off. Select the Gizmos menu in the Scene view and deselect Show Grid. Next we need to change the scale of the ground plane. To do this we can use the Scale tool (simply grab the axis handle you want to change and drag the handle, rescaling the plane), we can click and drag on the title of the fields we want to change, or we can type a number directly into the field we want to change. You can tab between fields

A single sided plane is visible when you look from under it, but not from the top.
