

All About Importing

In a globalised world, you've got to follow the money to know what makes the economy tick. Are all the brighter sides of importing what they seem to be or is there something more to the system? Let's find out.

Sitting in on any economics lecture would acquaint you with a number of terms that get thrown around often. Exporting, importing, demand curves, supply curves, elasticity and so on. Importing and exporting have been seen as the channels of exchange
