

the ‘Buy Now’ button at the right opportunity. This might seem simple, basic and unwanted advice, but this is something that works most of the time.

Keep refreshing

Keep refreshing the page, every minute if possible, as sometimes the page might take a little while to update itself when left idle for long periods. Keep refreshing the page, especially when it’s close to the sale time. Ideally, refresh the page about 2 to 3 seconds before the sale begins, and you will have a ‘Buy Now’ button posted on your page.

Use Cash On Delivery

Using the cash-on-delivery (COD) option ensures fast checkout, in case it is available. There are no details to type, no OTP to receive and as a result, there would be faster payments. In case there are no COD options, pre-filled

Choosing Cash on Delivery option

payment methods would work fine. Payments using Unified Payments Interfaces (UPI) platforms like PayTM, BHIM and Google Pay are also quick. Making fast payments is key to tackle the competition and the rush.

Use flash sale extensions

Most popular browsers have extensions that help complete flash sales
