

Firefox. Unfortunately, many of the very good extensions for shopping, such as Piggy, Cently and Gumdrop are only available in western or European markets. However, some of these will work on the international version of Amazon, when buying from India. For this Fast Track, we are considering only the tools that work in India. Now, let us go through the tools available to improve your shopping experience.

Honey

When it comes to online shopping, Honey really is your best friend. Honey saves you the trouble of having to find promo codes, and allows you to find them automatically through the plugin. As soon as you enter a website that is supported by Honey (both Flipkart and Amazon are supported in India), you can see a drop down list of applicable coupon codes for that site. Additionally, there will also be contextual information, such as how many days ago that particular coupon code has actually been applied. Now while you can see some coupon codes during the process of buying itself, Honey shines when it comes to the point of checkout. This is when a number of coupon codes normally hidden from

Honey

view show up. Usually, almost every product you want to buy, will have a coupon code that can be applied. Also, this coupon code stacks with any offer that may be ongoing at the moment. If you come across a coupon code in any other media, such as newspapers or smartphone alerts, you can help out all the other people using Honey, by adding the coupon code through the plugin itself. Using all the features mentioned so far does not require you to sign up for an account with Honey. However, signing up does have its benefits. Users who opt in for an account get two benefits. You can avail cashback offers on some stores, and save items in the Honey Droplist. The prices of the items in the Droplist are tracked, and Honey can be configured to send you an alert when the prices of the items in the Droplist reduce. There is really no reason to not use this plugin, and significantly improve your shopping experience.
