

In this part of the series, you'll learn how to open up a sample scene and start working on it from both ARKit and ARCore.

Let's move on to the steps for configuring the build settings for the main project before creating the app.

Let's get down to building a small sample app and then running it in both ARCore and ARKit.

Images can be programmed to be identified and treated as representative markers.

Connecting devices through cloud anchors.
