

```

•
• mScene = new ARScene();
•
• mScene.displayPointCloud(true);
•
• // Create a TrackedPlanesController to display tracked
planes visually
•
• TrackedPlanesController controller = new
TrackedPlanesController(this, mViroView);
•
• // Spawn a 3D Droid on the position where the user has
clicked on a tracked plane.
•
• controller.addOnPlaneClickListener(new ClickListener()
{
•
• @Override
•
• public void onClick(int i, Node node, Vector clickPo-
sition) {
•
• createDroidAtPosition(clickPosition);
•
• }
•
• @Override
•
• public void onClickState(int i, Node node, ClickState
clickState, Vector vector) {
•
• //No-op
•
• }
•
• });
•
•
•
• mScene.setListener(controller);
•

```
