

```

• // Update is called once per frame
• void Update () {
•     if (Input.touchCount > 0
&amp;&amp; m_HitTransform != null)
•     {
•         var touch = Input.Get-
Touch(0);
•         if (touch.phase == Touch-
Phase.Began)
•         {
•             var screenPosition =
Camera.main.ScreenToViewportPoint(touch.position);
•             ARPoint point = new
ARPoint {
•                 x =
screenPosition.x,
•                 y =
screenPosition.y
•             };
•         }

```

SceneKit Demo Results

```

• // prioritize results types

```

```

9  import UIKit
10 import ARKit
11
12 class ViewController: UIViewController {
13
14     @IBOutlet weak var sceneView: ARSCNView!
15
16     override func viewDidLoad() {
17         super.viewDidLoad()
18         // Do any additional setup after loading,
typically from a nib.
19     }
20
21     override func didReceiveMemoryWarning() {
22         super.didReceiveMemoryWarning()
23         // Dispose of any resources that can be re
24     }
25
26 }
27

```
