

App building in ARCore

```

• // The color object is from `com.google.ar.sceneform.
  rendering` package
• var cubeRenderable: ModelRenderable? = null
• MaterialFactory.makeOpaqueWithColor(this,
  Color(android.graphics.Color.BLUE))
• .thenAccept { material ->
• // This is async and will be called when the
  material has been created
•
• val size = Vector3(1F, 1F, 1F)
• val center = Vector3(0.5F, 0.5F, 0.5F)
• cubeRenderable = ShapeFactory.makeCube(size,
  center, material)
• }
•
