

Next-Gen AR platforms

Apple ARKit2

- ▶ Updated to ARCore 2.0
- ▶ New USDZ file format for AR content, optimized for sharing
- ▶ Improved face detection and 3D object detection

Google ARCore

- ▶ Updated to ARCore 1.2
- ▶ No need for positional marker for 3D inserts in real world visuals
- ▶ Cloud Anchors will link multiple phones to the same temporary experience in the same place

Anchors can link multiple phones, regardless of whether they're Apple or Android

```

•   let planeNode = node.childNodes.first,
•   let plane = planeNode.geometry as? SCNPlane
•   else { return }
•
•   // 2
•   let width = CGFloat(planeAnchor.extent.x)
•   let height = CGFloat(planeAnchor.extent.z)
•   plane.width = width
•   plane.height = height
•
•   // 3
•   let x = CGFloat(planeAnchor.center.x)
•   let y = CGFloat(planeAnchor.center.y)
•   let z = CGFloat(planeAnchor.center.z)
•   planeNode.position = SCNVector3(x, y, z)
•

```
