Magic Markers For Sharing Content Online

A safety tag for the device is entered to keep the system secure and to ensure that no unauthorised device gains access using a configuration command.

```

• <!-- Add the lines below -->
• <meta-data
•     android:name="com.google.android.ar.API_KEY"
•     android:value="<YOUR_API_KEY>"/>
• Config config = new Config(session);
• config.setCloudAnchorMode(Config.CloudAnchorMode.ENABLED); // Add this line.
• session.configure(config);
• private enum AppAnchorState {
•     NONE,
•     HOSTING,
•     HOSTED
• }

```

An anchor trapping function is added to the code.

```

• @GuardedBy("singleTapAnchorLock")
• private AppAnchorState appAnchorState = AppAnchor-

```
