

CHAPTERS

GETTING STARTED WITH AI JANUARY 2019

06
PAGE

Making Through The AI Madness

Is the whole domain of machine learning an ordeal too tough, for people to master? It doesn't hurt to know a little more than others.

14
PAGE

Understanding deep learning

Deep Learning is making the distant image of future, a very possible reality, slowly, but surely. Let's delve deeper into this world.

28
PAGE

Develop a knack for Neural Networks

Is it tough to learn and master the concepts of neural networks for the average layman? A little learning can go a long way.

36
PAGE

Convolutional Neural Networks

Deep Learning is no longer limited to data and has stretched far to other forms of content. Its applications are manifold today.

44
PAGE

Hardware and Software

Let's review and compare some of the most common hardware and software tools for deep learning in the industry.
