

Reference links

Right down to the finish line and we've just completed a TensorFlow object detection system. For the curious bunch, there's a lot more to review and see.

First of all, congratulations on getting till here and completing a module for object detection on one of the best platforms in the industry. If you want to uncover more about where the coding, scripts, language syntax, packages and debuggers have been sourced from, then read on:-

TENSORFLOW EXTENSIONS

The links below contain tutorials and github repositories for the TensorFlow toolkit along with a direct API example for further reference to be taken once you've had a successful execution.
