

Here's an edited image done by an expert, Smit Joisher, Commercial Photographer.
What do you see here?

You will spend an inordinate amount of time doing simple edits. But as you keep practising, you will get better and familiar with the tools and tricks of the trade. As you advance further, you will start using advanced software to create even better images.

The above image has been captured and edited by Smit Joisher, commercial photographer in Photoshop. He has used several advanced techniques that we haven't covered here. What we have instead done, is used his original image and made our own edits and changes to it. We know it pales in comparison to this output, but hey everybody's got to start somewhere, right? **d**
