

Intermediate - Mobile

Editing on the go is one of the critical skills that should be mastered by every professional designer and editor.

Designers that can edit on mobile devices need to leverage multiple apps and tools to accomplish the task. While many intermediate-level tools are available to savvy designers, it's important to maintain the same level of quality that one can experience while editing on PC.

The final composition must be scalable and be adaptable across various devices. Mobile editing is also a viable solution when it comes to quicker iteration and editing on the go. Designers can edit while in transit or during
