

	A	B	C	D	E	F	G
1	Expenditure						
2			Month number	3			Total
3			April	May	June	July	to M03
4	Ward 10		89,752	44,324	81,193	65,063	215,269
5	Ward 11		35,324	87,338	56,219	91,235	178,881
6	Ward 12		63,290	15,295	59,293	86,468	137,878
7	Ward 13		60,277	69,067	81,691	2,068	211,035
9	Totals		248,643	216,024	278,397	244,833	
10			[C9]=SUM(\$C\$4:\$C\$7) OR =SUM(R4C3:R7C3)				
11			[D9]=SUM(D4:D8) OR =SUM(R[-5]C:R[-1]C)				
12			[E9]=SUM(E4:E8) OR =SUM(R[-5]C:R[-1]C)				

R1C1 reference operations performed

It's also excellent to use when writing VBA code for machine learning. You also don't need to write out the entire formula when using R1C1. You can reference the appropriate cell by having the RC outside of the brackets.

Relative references like = (R[-1]C[-1]) can be performed for quicker calculations. You don't even need to look-up the exact row or column to perform these actions either. R1C1 allows you to become flexible in your approach and create more robust worksheets within the Excel framework. You can design complex algorithms using R1C1 effortlessly.

R1C1 for advanced users

R1C1 is a helpful tool for quick calculations and advanced coding. It is used extensively in the VBA environment, wherein it can make more robust assertions. It can also be used to design complex architectures that can reference nearby cells as a + or -. This frees up bandwidth to perform quick iterations that don't need to reference the cell labels each time.

However, if you're just starting out, the A1 reference is quite effective. While some industries insist on using R1C1, it's the advanced user that gains all the benefits of doing so. Advanced users can benefit from using R1C1 owing to the inherent advantages being found in complex coding.

When you're an advanced coder in the R1C1, you can design formulae that rely on concurrent information flow. You also can perform absolute and mixed referencing within the R1C1 quite effortlessly.

The entire data flows much better under the R1C1 format, and you can uncover insights easily. You also are given access to a host of new features that get unlocked when you learn R1C1. **d**
