

The Opening Screen

Press **Esc** to close the screen or click anywhere besides the splash screen.

## Introduction

This is what we will see when we close the Splash Screen. There are five main sections to the screen visible to us (image in the next page):

- **3D Viewport (yellow):** The most prominent section of the screen. It is right at the centre with a cube by default.
- **Outliner (Red):** The outliner view is on the top right section. It gives a hierarchical view of the scenes and the objects in those scenes. We can see certain default objects like the cube, lamp and camera.
- **Properties Editor (Green):** As the name suggests, this section is used to modify properties of various elements ranging from rendering properties to the physics system.
- **Timeline (Pink):** At the bottom of the screen we have the timeline for animation.
- **Header (Blue):** File operations are present at the top header bar.

## 3D Viewport

The viewport is where you can see your work in action. It has two collapsible panels: one on the left and other on the right.

By default we only see the one on the left, the Tool Shelf. The Tool Shelf shows the tools based on the current mode we are in. We can collapse the panel by dragging it to the edge of the screen and can expand
