

used to toggle the header visibility. To exit the fullscreen use the shortcut Alt-F10 or move the mouse to the top right corner of the area and click on the return icon.

Regions

Main Region

The most prominent part of the editor is the main region. It is always visible along with many others. Different editors have different purposes, so the main region and additional regions vary from editor to editor.

Header

The header is the bar that rests at the top or bottom of the area. It contains menus and all the commonly used tools. Headers are specific to the areas they reside in. Depending on the editor type, selected object and the mode, the menus and buttons vary.

You can use the hotkey Alt+F9 to hide a header. You know a header is active if its shade of grey becomes lighter. All the shortcuts for the editor are now activated.

3D View editor Header.

Operator Panel

The Operator panel is part of the Tool Shelf (explained earlier). It displays the properties of the operator last executed in the 3D view and the file import/export options in the File Browser .

Properties Region

By default, it is on the right side. The editor and the settings of objects within the editor are in a Panel inside the Properties Region. To toggle the visibility of Properties Region, press N.

Arranging

Scrolling

A region can be scrolled in the same way as the view using the Middle Mouse Button or by tweaking the setting and using Alt + Left Mouse Button. You can scroll normally if there is no zoom in the region.
