

8. Add another node, Add -> Shader -> Glossy BSDF
9. Add yet another node, Add -> Shader -> Mix Shader
10. Connect the outputs of the Emission and the Glossy shaders (let them remain at their default settings) to the Mix shader and leave the factor at 0.5 (you can toggle it later to see how it affects the output).
11. Now one last step, connect the shader output from the Mix Shader to the Material Output node.
12. Switch to rendered mode. And Voila! There we have our cool looking shiny, glossy cube.
