

DIY - Animation

Let's get you familiarised with the animation concepts within Blender.

Blender is powerful with its animation tools, and we can animate pretty much anything using these tools.

We will try to build a tiny, happy mushroom that will hop and nod as it moves. We will learn how to render out a sequence of images which can be used in a sprite sheet and animate our little mushroom.

To get the most out of this make sure that you know at least the basics of working with the Blender interface.

This tutorial by no means is an extensive guide to the plethora of things that Blender offers. Rather we will focus on building some very basic animation as mentioned above so that you can get a basic idea of how animation in Blender works.

Now, let's get started.
