

Changing the object origin

Deselect everything. Switch to vertex select and select the bottom vertex which is at the centre. Hit Shift+S and choose Cursor to Selected. Now deselect all. Switch to object mode.

Now to place object back to where the 3D cursor is, go to the Origin > Origin to 3D Cursor.

Go over to the Object tab and change all the location attribute of all the three coordinates to O.

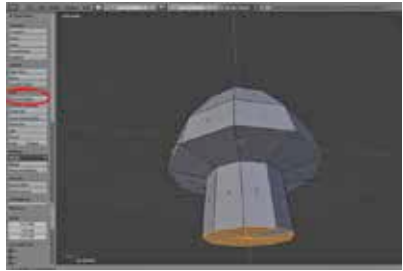

Select the surface to extrude

Colouring the Mushroom

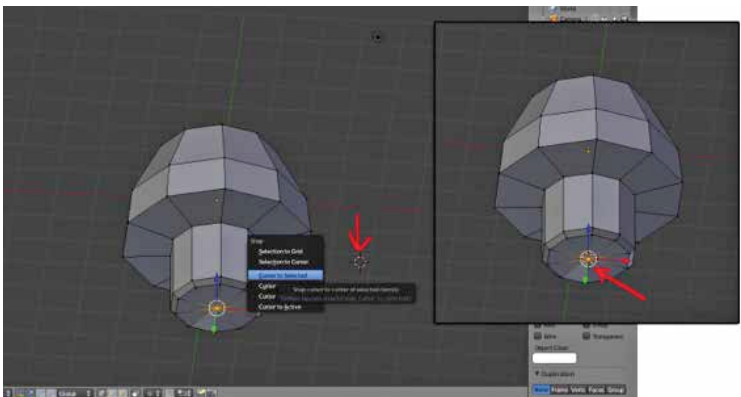

For this tutorial, we will skip the colouring part.

Now time for the most exciting bit: Animating and Rendering the mushroom that we made.

Voila! You have a stalk

We took the liberty of making our mushroom prettier and giving it tiny eyes.

Centering the mushroom to the origin
