

Setting origin to 3D cursor

Our aim now is to make our mushroom hop and nod and do this while moving.

Before we do anything else, we need to add texture.

Adding a Texture

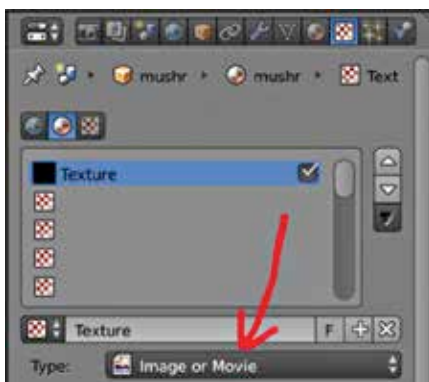

Select the Texture Context button from the Properties window.

Click on the 'New' button to add a new texture.

The default Type needs to be changed from Clouds to Image or Movie. Now look for the image panel and select our previously made mushroom.

For Mapping, go for UV for Coordinates and UVMaP for Map.

That's all. Remember to save your work.

Adding a texture

Armatures

Armatures are just another type of objects in Blender functionally similar to
