

Play Store. Apps on these platforms are normally safe and pass through various requirements before they are made available on the app store. Never download *.apk files or similar mobile format files directly from the internet.

Conclusion

As the internet plays a major role in every business' success, it's important for the business to stay online and be on the hunt, along with other businesses, to be more productive. With these protective methods in place, businesses can avoid becoming potential targets for hackers and lose their valuable data. A lot of these are things that we do every day but are to be done more religiously and in the right way to stay safe from hackers and malicious attacks.
