Django

Brief Description:

Django is a high-level, python web framework that encourages development and has a pragmatic design. The web application of the framework has good components with toolkits that all web applications need. The main goal is to allow developers to implement the same task or function over and over. It is free and open-source. Django is rapidly gaining popularity for its sensible design and ease-of-use. Django's framework will let you design your domain and code classes before you know it.
