LibreOffice**Brief Description:**

Libre Office is a free office suite which has a perfect interface which is enabled with fantastic tools. The options provided by this software will instigate the creative nature of the users. This open-source works out in ways to boost your productive level at work. The modern features are very attractive in nature. The components - writer, impress and calc have been perfectly streamlined for the users' benefits. Updates will be made regular to enhance the productivity. The software has allowed access to create and design pdf forms through Writer. Navigation option is fast in nature so that your search can be quick with the drop down list.

Why you must get it:

There are multiple benefits of using Libre office like mail merge, using writer for tables and so on. Sensitive data is suitable to work with Libre office which provides a feature of using open PGP keys to sign the ODF documents. To have this access GPG software needs to be installed so that keys can be generated. The extraordinary features of this software are Microsoft Office formats compatibility and interface. Frequent updates is a yet another benefit so that enhanced productivity at work can be witnessed. Unfortunately, insufficient real time collaboration support and integrated cloud storage are some problems present in the software. However, this is considered to be the best alternative to Microsoft Office.
