

Why you must get it:

Applications like spreadsheet, word processor, drawing, presentation graphics, equation editor and database are deemed to be quite productive. OpenOffice provides you with the ability to export pdf files from Word, Excel and Powerpoint. The collaborative effort of OneDrive and Outlook will help in sharing work and files easily. The software will comment and change tracks as well as connect with extension programs like Google Drive and Box.

Some of its good features are microsoft interface and standout compatibility with Microsoft Office. However, features like email support, cloud storage and mobile applications are missing in this software. But, comprehensive formats and specialised functions of the software make up for these.

AbiWord

Brief Description:

The traditional word processing method is involved in AbiWord. This is an open-source platform which is similar to MS Word. The ultimate aim of the program is to work on the various zones. So based on this information, all the other word processors would work on the Windows platform. Downloading AbiWord is easy and there are various installations types available like minimal, typical, full plus downloads. The user can choose the options either as functions or features. Adding or removing the installation functions is very easy.
