

form of invoices. If you are in the billing desk and if you would like to track the time spent on billing, the software makes it very simple and can provide you the relevant information. This can even work for multiple staff members. It brings together all the leads and helps the users easily track the leads to convert them successfully. It also functions well in automation so leads can be imported from the email and proposals could be created based on that. This aim is knowing the customers in an efficient manner.
