

to play directly without any setting wizard. This game is built with a player stats recording feature which keeps track of the each player's game progress. Multiple accounts can be created in one game but it doesn't allow for multiplayer.

Why you must get it:

As this game has nine core weapons, 16 full weapons, each with their own primary and secondary fire modes and most of them are quite useful in specific situations. These features makes this game more addictive in nature. The game is quite engaging so if a player starts playing this game, she/he won't leave it soon. The player might think that he has lots of time to experiment, however, the gameplay is so fast that keeping themselves alive throughout the game requires a lot of effort.

0 A.D.

Brief Description:

0 A.D. is an open-source, freeware game which is developed as a real-time strategy game by Wildfire games. It is a historical war and economy game. This game takes place between the period of 500 B.C and 1 B.C. for the first part. The second part happens to be around A.D. 1 to A.D. 500. This game is capable of running on the popular operating systems like Linux, Windows, Mac OS X, and FreeBSD. This game includes multiple units and building specific to each civilization as well as both land and naval units.

Why you must get it:

In 0 A.D., each civilization is unique in its background and strategy in the gameplay including units, structure and graphically made trees too. People who play this game become so engaged that they end up playing for hours without break. Some infantry and cavalry units can not only fight but also gather resources and use them for constructing buildings, making them more powerful and more versatile than other typical RTS games. Some technologies are arranged in pairs and within each pair you can only research one technology at most in each game.
