Pivot Animator

Brief Description:

The Pivot Animator, also known as the Pivot Stick Figure Animator, is a free software application which will allow users to create a figure that looks like a stick and has spirit animations. The user can save their work in the format of animated GIF which can be used on the web pages and in the AVI format too. This open-source software will provide the users with an easy-to-use interface that has quite a few features.

Why you must get it:

It is a free software application which is easy to install and simple to use it. The user can modify the Pivot Stickfigure of the animator frame in any way needed. It has some basic animation controls of playback such as play, stop, and repeat. The user can able to create their own objects, backgrounds and characters. The work file created by the users can be saved as .PIV project file or it can be exported into the animation of GIF. The Pivot Animator will let the users change the homepage and the default search engine of the web browser as well as install the extra tool bars.
