

them, you can view the Windows-type thumbnails as well. Hover on the icon and right click on it to be able to choose options.

Step 6 - To customize various features of the taskbar like the clock position, panel size or panel position, icon margins; right click on the Applications button and select the option Dash to Panel Settings.

You can restore the original Ubuntu look by using the Tweaks utility, moving the Extensions button to the OFF position on the Extensions panel.

Tweaks Utility Window

Tweaks Utility- Extensions Panel

Switch to Windows style popup Start menu

If you wish to modify the Apps menu (the apps grid that opens up when you tap 'Show Applications' on the bottom left) in Ubuntu to Windows-style Start menu, use Tweaks.
