

Similarly, day-to-day applications that you are used to on Windows have full-featured alternatives on Linux. So your workflow isn't going to be affected in the same manner as it would have been a few years ago. You can even check out last month's FastTrack wherein we've featured 100 open source software, of which a good chunk are also available on Linux.

So, you now have your favourite software and games running on Linux with ease. It's free and there is little worry about forced software updates that mess up your workflow. It even looks slick. Which is why we're bringing you this FastTrack featuring one of the most popular linux distributions out there. Give it spin, try out new things and let us know how things go down for you. As always, you can reach us on editor@digit.in
