

of building relationships with new people or sustaining relationships with the old ones. Though it has hugely bifurcated from the initial days when it was modeled, the primary aim of Facebook still remains the same. Hence Facebook can be advantageous for building the trust with the existing customer base of a particular business.

There are downsides as well; the most pertinent being a hindrance to expand the customer base because of its huge population. It is often hard to reach a new audience and posts have limited reach. Though Facebook works typically well when there are groups allocated for a particular purpose, it loses its functionality when operating within the huge, unsegregated population.

So the business goals should be carefully thought of, as Facebook might prove very useful in staying and connecting with the dedicated following of clients, but not that effective in increasing business.

Instagram

Instagram, one of the fastest-growing social media platforms, is bustling with artists, art appreciators, photographers and the like. Since Instagram is fashioned in the mode of a visual-based platform, where the posts are in the form of photos and pictures, the youth percentage of its users is sizeable and growing. The young audience like to engage in photos for conversa-
