

the creator of the Instagram profile. How users contact, follow and interact with you is up to you, and you have every right to make your posts private and public as per your wishes.

Optimal hashtag usage & How to look up hashtags

Hashtags are the most significant tools of promotion of any post on this social media platform. A hashtag is a one-liner which preceeds with a Hash sign #, and it helps linking trending topics. Hashtags are promotional means of linking common words and interests. For instance, if you have created a profile to explore the world of fitness, you can use a hashtag like '#FitnessIsStrength, and then you automatically link your post with other posts using the same or similar tags. General social media users looking at random posts with these tags are likely to come across your page through the post using the hashtag.

The key to making your profile accessible is to adopt a balanced amount of hashtags. Optimal balance of the hashtags helps prevent confusion, both for you and your profile visitor. In order to maintain a perfect balance of the hashtag usage, common and eye-grabbing hashtags can be used. You have to decide which hashtag is best suited for your particular post. A small number of hashtags can also prove to be effective.

It is important to understand how to keep updated with trending and influential hashtags. To be familiar with hashtags on Instagram, one can visit the search option of the Instagram page, where there is an option of searching for

Hashtag is the name of the game

tags. Selecting the tag bar, you can use words related to your niche interest. A series of hashtags will appear, showing you the current and trending tags.

Utilising stories vs posts

The Instagram posts are your posts with attached descriptions and hashtags. You promote an idea or concept in words while using the post. The posts make up your entire profile. Your posts are permanent unless you delete them. They help in increasing access and the number of visits of social media users depending on the regularity of posts. The posts spread your
