

track conversions from the beginning phase itself. Here go through the comprehensive guide:-

Define your goals: Defining a goal is the first successful step towards effective conversion tracking. You need to gain a clear insight into whether you are looking for subscribers or you want people to buy some products or simply want them to read your content.

Creating FB pixel and allocating it a value: The majority of people only emphasise on creating FB pixel but if you add a value to it in monetary terms you will be able to track ROI accurately.

Place the pixel on a page and start tracking: Once everything on its place, you will begin witnessing the data in the ads reports. For every ad, you will be able to figure out how much you spent in getting the conversion and how much you fetched from each conversion.

Optimise for ROI: Within a few days of the successful running of ads, you will be able to figure out that few ads are getting clicks but failing to generate a single conversion. while others are not attracting too many clicks but turning into qualified leads. So keep those ads that are generating leads despite not attracting clicks and discards the remaining.

To sum up, conversion tracking may prove to be a game-changer as it enables you to gain deeper insights related to the performances of FB ad campaigns,

Facebook In Ethical Perspective

Technology must work towards empowering its users. It is the responsibility of every social media platform to ensure protecting the information of users from the threats to personal security and breach of privacy. Behavioural information comes with an expiry date and hence storing the information indefinitely does not serve any purpose. Until and unless customers completely agree to share their information, it should not be shared with others.

Of late, there has been a lot of hue and cry over the entire ethical issues surrounding Facebook. Despite trying its best, this social media platform has failed in living up to the expectations of its user in the context of ethics.

Facebook has been attacked by numerous countries one after another after several loopholes were discovered related to ethics. Many countries also imposed fines on Facebook out of collecting data without revealing the purpose and use of such data.

Zuckerberg said in a statement, “Facebook’s mission is all about giving people a voice and bringing people closer together. Those are deeply demo-
