

## Step 2 – Filling out the details

Now, you have a new YouTube channel. As it is still an initial stage, your channel looks a little morose. Why don't you create something and turn it into an attraction? Change the icon so that viewers find it attractive when they visit your channel.

- Go for the “Customizable channel” option and bring the cursor onto the “Edit” button.
- Upload your best photo or video.
- Generally, the picture should be about 800 x 800 pixels.
- The next step is that of adding perfect channel artwork.
- Also, give a nice description of your channel.
- Don't feel afraid to go for any on-going style.

## Step 3 – Optimising the YouTube channel

Those were some of the fundamental steps to start a channel. Just a little bit of work left now, and that is to optimise it. The step has two simple points.

- Adding the details -  
Include all your details in the ‘About’ section. Don't forget to save them.
- Adding video -

The very next thing is building a keyword-rich playlist. This not only enhances your SEO but also improves the search traffic. Now, you can easily organize each video on different topics.

## Ads are essential

YouTube is a powerful tool, which has accepted the peculiar new ad-placement algorithms. In 2017, Google announced to bring changes in AdWords; it allows most of the advertisers to reach their audience. Placing the ads rightly is quintessential to maintain the flow of any video. There are simple tips by which one can easily place the ads.

- **Selecting the format wisely**

At present, there are numerous formats available. It is better to go through each one of them and get the information about it. According to your requirement, you can select the one.

- **Discovery ads and segment In-Stream ads are completely different**

You must have the knowledge that both are completely different from others. In-stream ads are used before, during or after the videos. On the other hand, the discovery ads are part of YouTube search results.

- **Take the help of YouTube targeting options**
