

The Future

Talking about the future, WhatsApp will make paid advertisements possible by including them in their story-section, and that too, as soon as 2020. This means that the amount of money invested is bound to increase, and so is the potential of returns with the reach going farther than before, reaching potentially millions of WhatsApp users around the world who'll see the campaign more than they see advertisements on Facebook or Instagram.

What products work best

Looking at all the information about WhatsApp Marketing, there is this question that still exists in our minds, What products work the best for marketing on WhatsApp? While it is true that you can create your brand value and keep the customer engaged via WhatsApp, and it is also true that you cannot sell everything through the same medium.

If we look closely at this matter, we'll find that usually the product-based services about retail are easily marketable on WhatsApp, while services

Simplistic, efficient UI
