

We often come across advertisements on Instagram. These are usually from companies that we like or products we use. They have monetary value for the companies that launch these advertisements.

Facebook

Utilising keywords in FB Page description

“Your Facebook business page is an important landing site for existing customers and potential clients. It is essential that your page be displayed prominently in search engine rankings. Facebook controls the structure of your page, and displaying keywords prominently in the default tab has limited effect. You can fill the available spaces and links with relevant keywords to optimize your page’s search engine ranking.”- Chron

Getting more followers via Facebook ads, organic marketing

“The benefits of organic reach is that you can publish posts for free. With the increasing flood of content published in news feeds in recent years, decent organic reach is getting harder and harder to achieve. However, there’s no need to be daunted if you don’t have a budget to spend – this predicament can allow you to get more creative and strategic with your ideas.”- Digital Marketing Institute

Using Facebook Pixel

“Facebook pixel is an analytics tool that allows you to measure the performance of your advertising by understanding the actions people take on your website. Each time someone lands on your website via a Facebook ad and performs an action, such as making a purchase, Facebook pixel reports the action. This way you can track the actions people take and create custom audiences, and Facebook learns which people are more likely to take certain actions, thereby increasing your conversions.”- Axiapr

Tips to build the right ad

“While just about every social-networking platform now has its own fully integrated advertising system, Facebook still reigns supreme in terms of features, insights and audience. As a business, that means Facebook
