• 1 final inputBar = Padding(
• 2   padding: EdgeInsets.all(8.0),
• 3   child: Row(
• 4     children: <Widget>[
• 5       Expanded(
• 6         child: roundedContainer,
• 7       ),
• 8       SizedBox(
• 9         width: 5.0,
• 10      ),
• 11      GestureDetector(
• 12        onTap: () {},
• 13        child: CircleAvatar(
• 14          child: Icon(Icons.send),
• 15        ),
• 16      ),
• 17    ],
• 18  ),
• 19 );

```

When we incorporate the above coding the right way for the other two icons, we can complete the design of the inputBar.
