

- Integrated antenna and above par RF performance
- Configurable TX power up to +8dBm ARM Cortex M4 core with 32 kB RAM and 256 kB Flash
- Low Consumption of power
- Flexible MCU peripheral interfaces

<http://www.cnx-software.com>

Mobile app

- Mobile app available for both Android and iOS
- the iOS app is implemented in swift
- Android app implanted is in native code
- Source code available online on platforms like GitHub

Mobile app features

- Beacon notifications
- View sensor data
- Control LEDs and detect button pushes
- Stream sensor data to the cloud

Cloud streaming

- Data storage is done in Firebase
- Frontend web implementation in ReactJS
- Flux implementation is done in Active.js
- D3.js for data-driven charts
- All source code available

Input and Sensors

- Si1133 UV Index and Ambient Light Sensor
- Si7021 Digital relative humidity and temperature sensor
- Si7201 Hall-effect Magnetic Sensor
- Invensense MPU-6500 Six-Axis (Gyro + Accelerometer) Motion

5. NRF52-DK

Nordic Semiconductors recently released the much-anticipated develop-
