

are detailed in this FastTrack. We've covered Raspberry Pi and Arduino as dedicated FastTracks which you can refer to for more information. This FastTrack is more focused on the basics and the hobby electronics concepts that'll help you get your feet off the ground. To do that, we do have a couple of practical DIY projects in the latter chapters.

To get access to our previous FastTracks on Arduino and Raspberry Pi, just drop an email to archive@digit.in and we'll hook you up with the copies. Once you're done making a DIY electronics project, please do write to editor@digit.in with all the details and we might have something in store for you!
