

The graphics of the game are very realistic, and you get an immersive experience all the while. The menu has limited options – Hero, Skin, Card, and Items, and that only enhances the developers' motives behind this game.

They have a ranking and matchmaking system to ensure that players on the same level of skill get to fight each other. If you are willing to be a part of a team and play your role, this is one game you must try out.

Dungeon Hunter Champions

Dungeon Hunter Champions come from the renowned house of Gameloft and is a 5v5 battle game scenario game. It's not exactly a traditional MOBA, but if you have played any previous Dungeon Hunters game, this game will feel very similar. You can choose to go solo or be a part of 5 to play this RPG game.

There are several champions to choose from, and each of them has up to 4 unique abilities. The controls are similar to what we have come to expect from a mobile MOBA, and it doesn't disappoint.

Apart from the regular buttons, you get the buttons to toggle the four special skills on the right. There is also an auto-toggle mode which activates the modes automatically and plays the game automatically on your behalf.

The gameplay is divided into two major categories – Battlegrounds and Adventure.
