

Adventure is the story mode which comes with various stages and varied difficulty levels for you to opt. All of the action is in the battleground where you play as a hero set out to defeat his opponents. The graphics are epic, and you will have a visual treat throughout the gameplay. The best part about Dungeon Hunters is its customizability; you get to customize a lot more here than in any other game.

Arena of Valor

A game perfected for Indian Servers, Arena of Valor comes from Tencent and claims to be the classic MOBA setup that we all are acquainted with. It is a hugely popular game all over the world.

As soon as you enter the game for the first time, you face a tutorial. After that, there are several modes to play, and most of them have the same objective – to destroy the enemy team core, present at the heart of their base.

Arena of Valor is a free-to-play game with in-app purchases to enhance the gameplay. However, there are coins and currencies you can collect, including a currency called gems, which you can use to buy in-app purchases without actually paying with real money.

There is an auto-buy feature present as well, which lets you decide what to buy for every hero in advance.

The gameplay is butter-smooth, and Tencent has done a commendable job porting it to the Nintendo Switch.
