

All that matters is how well it runs, and in our experience, it is a breeze. The movement and everything about the game are spot-on and very easy to master. You start with a Gem Grab mode, which is a 3v3 game where you have to grab and hold on to 10 gems to win.

As you move forward, several other modes get unlocked like Showdown, Bounty, Heist, Brawl Ball, and some special events. The heroes are called brawlers here, and all of them are upgradable.

There is not much to contemplate here; this game is an easy recommendation. **d**
