

GWENT

Gwent is another card game that has also gained popularity by the name of 'The Witcher's Gwent'. If you love games with an authentic literary source material, you are absolutely going to love Gwent. Excellent action RPG and fantasy quest make it an example of high-quality modern games.

The popular game was enjoyed until now by PC users, and in 2019 the game is set to be launched for IOS devices too on 29th October 2019. Moreover, the game is also set to be released for Android devices and the company has stated that they might schedule and announce a date sometime later this year.

The game is played turn wise and every turn, a card is played by each player from the set of 22 cards. The game, overall, is made up of three rounds. The game is won by the player who wins the 2 rounds out of three. Gwent hosts an arena mode in which a player is supposed to build a deck with random cards. The random cards are shown and chosen from cards of all types and genres.

No particular number or limit is set as to the presence of gold and silver cards in the deck and you are free to use of any number of these cards for deck building. Special events, which last for the time period, keep coming and going, although the arena mode is always available and free to play.

Stormbound: Kingdom Wars

The formula of the Clash Royale games has always been a trendsetter for many new games. Stormbound Kingdom Wars seems to have won it when it comes to uniqueness and making its way.
