

other areas. At its core, it is just like another ‘pipe’ puzzle. You need to tap on different pieces of the aqueduct and align them in such a way that water flowing through it reaches the desired destination.

There are some levels that are timed. However, if you block the flow of water, the timer stops, allowing you to solve the puzzle at your own pace.

Another striking feature in this game is the soothing background score. Here’s the thing: once you start playing Aquavias, you are guaranteed to keep playing it for hours on end. The soothing music makes those hours flow by in what seems like minutes. Although Aquavias comes in both paid and free (ad-filled) versions, the game does not have any in-game purchases.

Monument Valley 2

Much like its predecessor (which was crowned Apple Game of the Year 2014), Monument Valley 2 is centered around aesthetics and good storytelling. It is a puzzle you get lost inside, a fantasy world you want to live in and a beautiful place you want to visit again and again and again...

The sequel to the runaway hit in 2014 returns with Ro, who is traveling with her child. Replete with a heart-warming color palette, euphonic background music, and gorgeous locales, Monument Valley 2 delivers on the expectations from its prequel. Together, they must reach their destination safely by solving the predicaments (read: puzzles) on their way, which becomes increasingly more challenging as the game progresses.
