

Bridge Constructor Portal allows you to try out construction mode, test mode, and vehicle mode to arrive at the solution. Test mode simulates the physics of the level to see how the bridge components stand up under their own weight. Vehicle mode sends one or more trucks through the player's solution. In addition to that, GLaDOS (Yes, that's a Portal reference), the game's artificial intelligence helps you in your pursuit.

You will be shown any struts or cables that are under stress in red. This means the design is unsuccessful and the bridge will not be able to withstand the load. If you succeed in designing a bridge to successfully take the weight of one vehicle, you can then try to send multiple vehicles at regular intervals and test the strength of the bridge. You can clear a level by sending just one vehicle across the bridge, but your ratings take a jump if you can construct a bridge strong enough to let a convoy of vehicles pass. And that's not all. While you are at it, you will also have to ensure your solution is economical.

Twenty48 Solitaire

Can mathematics be fun? Most people would disagree. But they would probably agree if they play Twenty48 Solitaire. Why? Because it requires a combination of the number-crunching skills of 2048 and the 'fun' feel of Solitaire! Seems strange? Well, if you think about it, yes. But once you play Twenty48 Solitaire, your opinion is bound to change.

Combining the old-world charm of the classic Solitaire with the new-age cerebral 2048 has resulted in a game that is quirky, interesting and extremely
