

the go, which is the best part. Anyway, here are what we think are the best sports games for mobile in recent years. Check them out!

NBA 2K20

Visual Concepts' NBA 2K20 is among the most popular sports games on mobile right now. Launched on September 6, 2019, NBA 2K20 is also available on Microsoft Windows, Nintendo Switch, Playstation 4, Xbox One and now, even mobile. You won't find a better basketball sim game on the market right now.

NBA 2K20's newest featured mode is the MyTeam mode. The mode focuses on the formation of the best and ultimate basketball team, where players need to acquire and sign players up to create their dream team. The whole setting of the game gives players a very tournament-like feel.

Unfortunately, NBA 2K20 does feature a lot of in-app purchases which makes things a little easier. But like we mentioned above, there are very few basketball sims that can compete with NBA 2K20.

Madden NFL Overdrive

Madden NFL Overdrive is the latest and most significant update in the Madden franchise. The all-new, season 6 of this game was launched on July 30, 2019. For starters, this mobile game is a game that is based on the American series of football. If we told you that this game has already sold over a 130 million copies, would you believe us? Real-life players
