

transport you right inside the car and make you feel like you're looking out at the world outside from within the window panes of the cars. Every minuscule detail has been realistically sculpted into the body of the 3D car models that it looks unbelievably real. A prolific sense of aesthetics

with which the assets of the game have been architected undoubtedly elevates it to the next level of gaming experience. The game is also known for its seamless control over its brakes and navigation that cuts it apart from the rest.

Mario Kart Tour

If you really want to discover the child that still lies buried beneath the signs of your maturity you should definitely try your hand at Mario Kart Tour. The visual aesthetics of the game stand in stark contrast to the conventional assets and environments widely used in the genre of racing. The caricature of the characters and the models of carts used in the game are all from the world of Nintendo. You've got classic characters like Mario and Luigi, Zelda, Wario and more racing it out on exotic race courses. Instead of looking too perfect or realistic, the visuals of the game appears to be painted with a myriad of colors from your imagination. Everything that catches the eye has intentionally been designed with the essence of childlike simplicity that would probably have you captivated under its spell. Everything looks pretty happy in the game. The use of bright colors in the background, sparkling smiles on the
