

racing. The game throws a whole new range of exotic bikes from the stable of global automobile firms of good repute at you. The virtual bikes as created in an immersive 3D environment keep bordering on the real prototypes of the iconic bikes. One can, in fact, pick and choose bikes as they please but towards the beginning of the game, you have to start with a basic model which is quite plain. As you keep clearing levels and get climbing up along the way, we will be offered with an entitlement to upgrade your bike. You can even choose to modify and remodel your

existing bikes by buying accessories from the online store in exchange for money earned by winning races in the game. The game also offers a 3D rendition of real exotic locations from England, Turkey, and Spain against the backdrop of which the races are conjured up.

The game is reported to be one of the most downloaded apps on android. It was launched in 2019 itself and within a very short span of time, it has managed to garner huge popularity.

Thumb Drift -Furious Racing

The uniqueness of the game lies in the fact that you can play the entire game and complete all the levels using just your thumb. The control of the game lies with your thumb and one can comfortably play the game using their smartphones or tablets of any shape or size. You can even stay plugged into the game while being in the transit as it does not usually require any other finger other than your thumb.
