Interactive games have always been one of the favourite choices amongst gamers all along. A whole new virtual world that tests your decision-making skills and reaction to new scenarios always keeps you on the edge of the seat.

Quick thinking, strategy, and situational awareness are some words that can be used to describe a typical Interactive Story mobile game.

This guide will tell you all about the perfect games to bond with your loved ones, be it a gaming weekend or a party. Let's get right to it!

80 Days

Inkle Studios' 80 Days is a travel-based game in which one has to circumnavigate the Earth in 80 days - using trains, camels, hot air balloons, gyrocopters, etc.

Are you thinking, "what's so great about this?" Well, the year in the game is 1872, which means there is no GPS technology, high-speed aircraft, or submarines to help you out. The maps, too, are not precise; it's up to you to discover shorter and safer routes to get to your destination quickly.

You have to interact with the people you encounter on the way to obtain nuggets of useful information to help you reach the next city. This
